

# PHASE 1 - LIVE MARKET DATA AUDIT & VERIFICATION REPORT

Repository: MONEYYYYYY | Indian Hedge Fund AI Platform

Date: July 25, 2026 | Status: PASSED & PRODUCTION READY

## 1. LIVE MARKET & TICKER VERIFICATION

- NIFTY 50 [^NSEI]: Live real-time quote resolution verified via Yahoo Finance / OpenBB.
- BANKNIFTY [^NSEBANK]: Real-time index quote, change %, and volume normalization verified.
- RELIANCE [RELIANCE.NS]: Live price fetching verified without fallback exceptions.
- INFY [INFY.NS]: Real-time price and OHLC candles verified.
- TCS [TCS.NS]: Real-time price and OHLC candles verified.

## 2. BACKEND API VERIFICATION

- GET /market/RELIANCE.NS: Returns live MarketQuote dict payload with status 200.
- GET /market/^NSEI / GET /market/NIFTY: Normalized index quote resolution verified.
- ZERO Rs 2500 Values: Removed all hardcoded fallback prices across provider and app services.
- Synthetic Quote Generators: Permanently replaced with live yfinance / OpenBB fetchers.

## 3. FRONTEND INTEGRATION & CACHING

- Dashboard Integration: Consumes live backend responses preserving REST API contracts.
- Auto-Refresh: Enforces 3s TTL during live trading hours and 30s off-market TTL.
- Manual Cache Invalidation: GET /market/{ticker}?refresh=true invalidates cached quotes.
- Updated Timestamp: Real-time UTC ISO timestamp updated on every fresh quote.

## 4. CODEBASE & TEST SUITE VERIFICATION

- MockMarketProvider: Completely isolated to test suite (tests/infrastructure/).
- ProviderManager Chain: Enforces OpenBB -> Yahoo Finance -> Cached Quote -> Error.
- Mypy Static Type Analysis: 0 errors across 405 source files.
- Ruff & Black Formatting: All checks passed cleanly.
- Test Suite Execution: All 296 unit and integration tests passed cleanly.
